

Multi Skilled Operator

job description

the finer details

Which site am I based at?

Which team am I a part of?

Who do I report to?

Who do I look after?

Team size?

Do you have responsibility for a budget?

the purpose of your role

You will work as an important part of a team supporting the production or supply chain team on the site you are based. Whilst ensuring a safe working area, you will undertake operational tasks to ensure we maintain the highest standards of product quality, the most effective use of raw materials and the highest levels of performance on our assets. You will support others within your working area to enable the whole team to deliver our fantastic products to our customers.

You will work to ensure the delivery of daily KPI's and targets in your area, ensuring high levels of efficiency and food safety standards. In your role you will complete first line reactive and proactive maintenance tasks ensuring optimal utilisation of our assets and the optimal use of raw materials.

Your responsibilities:

- Demonstrate a commitment to Health & Safety by working in a safe manner, role modelling our safety behaviours, challenging unsafe practices, rectifying unsafe conditions and escalating to other team members when support is needed.
- Active involvement, commitment and governance of the quality management system, making sure all relevant controls and procedures are completed effectively to validate food safety controls and the products we make exceed customer and consumer expectations. Escalate any food safety breach or quality issue and ensure that any product below our standards is identified and held and the issues are escalated appropriately, resolved and released.
- Understands, adheres and leads good manufacturing practices and company standards of hygiene, PPE, and dress code. Role models a 'Clean as You Go' approach, maintaining workplace organisation and visual management standards with the team.
- Effective operation and optimisation of equipment and priorities to meet the production demand and delivery of the highest quality of products.
- Through the ownership of performance and yield in your area/asset you will optimise running conditions and actively participate in improvement activities that ensure effective use of resources.
- Ownership of the changeover activities and material replenishment in your area/asset, optimising resources and raw material yields.
- Analysis and interpretation of operational machine parameters to support your effective decision making and drive improvements.
- Ensure the accurate and timely recording of downtime and raw material usage in an area.

TOGETHER

AMBITIOUS

DISTINCTIVE

TRUSTED
